Background Investigator Level I CACI

El Cajon, CA Full-time

Estimated: \$52,000 - \$72,000 a year Education: Bachelor's Degree

OPM is hiring Background Investigators in San Diego, CA.

Under the close direction of a Supervisory Investigator, the incumbent trainee conducts and reports record searches and investigations. The work may require travel on detail or itinerary and requires efficient planning of work and the submission of timely and complete records for reimbursement and productivity evaluations.

RESPONSIBILITIES:

Conduct comprehensive interviews with subjects, employers, associates, references, and other knowledgeable individuals and review appropriate records to obtain facts to resolve all material issues in a case or to establish the background, reputation, character, suitability, or qualifications of the subject under investigation. Document all information and submit a detailed report of investigation within a strict required timeline.

REQUIRED SKILLS:

- Typically has a University Degree (BA/BS) or 4 years of general experience
- Ability to pass a mandatory Pre-Employment drug test
- Successful completion of 6-week New Investigator Training

CLEARANCE:

Must have an Active Secret or Top Secret Clearance verifiable in JPAS (cannot be waived)

PHYSICAL DEMANDS:

Normal demands associated with working in an office environment. This position requires long periods of standing, walking and typing.

CACI employs a diverse range of talent to create an environment that fuels innovation and fosters continuous improvement and success. At CACI, you will have the opportunity to make an immediate impact by providing information solutions and services in support of national security missions and government transformation for Intelligence, Defense, and Federal Civilian customers. CACI is proud to provide dynamic careers for employees worldwide.

Charmayne Yorke Senior Technical Recruiter charmayne.yorke@caci.com

AVIONICS PRODUCTION SUPERVISOR (SPACECRAFT SOLAR) - 2ND SHIFT SpaceX
Hawthorne, CA
Full time

SpaceX was founded under the belief that a future where humanity is out exploring the stars is fundamentally more exciting than one where we are not. Today SpaceX is actively developing the technologies to make this possible, with the ultimate goal of enabling human life on Mars.

This candidate should have an excellent technical understanding of electromechanical assemblies. This role will involve the management of technicians on the production floor in the area of solar panel assemblies, which includes skill sets ranging from soldering solar strings to composites bonding to final mechanical assembly and electrical testing. Overseeing day to day tasks of technicians as well as scheduling.

RESPONSIBILITIES:

- Coordinate and steer the collective efforts of all spacecraft solar production technicians.
- Enforce area standards and run rules (includes bi-annual reviews and disciplinary action).
- Interface with area leadership and prioritize work based on production schedule and organizational goals.
- Schedule risk identification and mitigation.
- Coordinate support organization efforts to minimize production interruptions.
- Ensure product quality and conformance to specifications.
- Disposition non-conforming hardware to efficiently return them to conforming state and normal product flow.
- Improve area safety and efficiency through regular auditing and continuous improvement.
- Establish and analyze area metrics for trend extrapolation to drive the following:
- 1. Personnel training and development.
- 2. Development and implementation of efficiency improvement projects.
- 3. Optimization of product flow through the factory.
- 4. Root cause analysis and the implementation of corresponding corrective action plans.
- 5. Identification and elimination of defects within the area value stream.
- 6. Reduction of downtime for product and personnel.
- Lead efforts to transition product from engineering development to full rate production.
- Review drawings and technical data packages for manufacturability, provide constructive feedback to engineering/design community.

BASIC QUALIFICATIONS:

- Associate's degree or 5 years in electro-mechanical manufacturing environment.
- Minimum of 3 years in a leadership position leading a team of 15+ people.
- Minimum of 5 years of experience in an electro-mechanical manufacturing environment.

PREFERRED SKILLS AND EXPERIENCE:

- Bachelor's degree.
- Lean manufacturing training and experience.
- Experience monitoring, tracking and continually improving total cost equation.
- Experience with applying lean manufacturing principles, efficiency methods required.
- Demonstrated ability to read, interpret controlled documentation and processes such as: cable harnesses, wiring diagrams, layout drawings, mechanical drawings, GD&T, assembly procedures / work instructions, schematics, engineering drawings, and parts lists.
- Familiarity with Design for Manufacturability, Kaizen, Lean Manufacturing, Six Sigma, and Failure Mode Effects Analysis.
- Electro-mechanical assembly, composites, harness, and/or prototype development experience preferred.
- Experience preferred in fast-paced production environment with flight quality hardware.
- Six Sigma Certification.
- Able to adapt to constant changing work assignments and fast paced work environment.
- Proficient with computers, the ability to use MS Office, shop floor management software (ERP) and related programs.

ADDITIONAL REQUIREMENTS:

- Ability to distinguish colors is required.
- Must be available to work extended hours and weekends as needed.
- Able to travel for short and extended trips as needed. Up to 10% travel
- Must be able to lift 25 lbs. unassisted, stoop, bend, crawl, and being able to maneuver in tight spaces.

Data Platform Technical Lead PlayStation San Diego, CA Full time

PlayStation isn't just the Best Place to Play —it's also the Best Place to Work. We've thrilled gamers since 1994, when we launched the original PlayStation. Today, we're recognized as a global leader in interactive and digital entertainment. The PlayStation brand falls under Sony Interactive Entertainment, a wholly-owned subsidiary of Sony Corporation.

This is a technical lead position in the Data Platform Engineering group, responsible for development of the Sony PlayStation Network Data Platform, Data Warehouse, and related integration components. Data Platform is critical and core component in Sony Play Station Network and supports dramatic customer growth on the global, fast growing Sony Network Entertainment customer base, world class PlayStation consoles, hand-held devices, PlayStation TV, and network entertainment services such as PlayStation Now and PlayStation Vue.

The Individual's Primary Responsibilities Include:

- Lead technology of the high traffic, large scale, global Data Platform.
- Leads, coaches, mentors and inspires team of data, software, quality and operations engineers to effectively deliver data platform technology stack.
- Collaborate across business units, product teams and architecture community to develop platform vision, strategy, and roadmap.
- Effectively lead teams in researching new and emerging technologies to realize potential value, business fit and operations and cost efficiencies.
- Leverage technical expertise and industry trends to influence business and product strategy and development best practices.
- Effectively works in highly collaborative, agile environment with numerous stakeholders, platform program and product managers.

Qualifications:

- BS Degree in Engineering, Computer Science or equivalent experience.
- 10+ years' experience in Enterprise Data Platform solutions.
- 5+ years' experience in technical leadership role in Data Platform development.
- Extensive experience with distributed data storage and large-data processing like Hadoop, Hive, Spark.
- Experience in delivering data using streaming technologies Kafka, Flume and Kinesis.
- Extensive experience with data virtualization technologies like Composite.
- Extensive experience with AWS cloud hosting and data managed services on cloud.
- Extensive experience with data platform systems for large enterprises, preferably with near real time transactional data, using demonstrably standard data platform design techniques.
- Extensive experience in ETL and business intelligence.
- Exceptional technical experience and knowledge of web services technologies, integration technologies, data transformations and data analytics, managing and optimizing complex technology transformation.
- Knowledge and familiarity with Data Governance.
- Demonstrable experience in software architecture/design processes, unit testing, and test driven development.
- Excellent leadership presence In facilitative leadership of the team, leading meetings, presenting, and influencing across organizations.

- Extensive experience with agile development methodologies and processes required.
- Must possess outstanding verbal and written communication skills, and be able to work with others at all levels; effective at working with geographically remote and culturally diverse teams.

We strive to create an inclusive environment, empower employees and embrace diversity. We encourage everyone to respond.

We sincerely appreciate the time and effort you spent in contacting us and we thank you for your interest in PlayStation.

Universal Banker 1 NMLS - El Cajon Boulevard Vons (35 hrs)

U.S. Bank San Diego, CA Shift: 1st - Daytime

Average Hours Per Week: 35

Universal Bankers at U.S. Bank break the mold of what it means to be a banker. Focusing on sales and service, Universal Bankers open accounts, handle teller transactions, inform customers of other products and services that meet their needs, and solve customer questions and concerns with warmth and a collaborative spirit. Universal Bankers build relationships with customers based on trust, recommending financial solutions based on each customer's unique goals and needs. This includes actively developing new business and expanding existing customer relationships through activities such as outside sales, workplace banking, tabling events, visiting local businesses, apartment complexes, consumer loan originating, and closing and new account opening. At In-Store locations, Universal Bankers perform public address announcements and in-aisle marketing. At On-Site locations, Universal Bankers perform outside and/or campus marketing and sales activities to include walking around campus distributing flyers, and talking to students and faculty about U.S. Bank's products and services.

At U.S. Bank, you'll get the support and tools you need to meet your goals and build a meaningful career. We reward top performance and ethical team players. Eligibility for incentives is based on sales referrals, branch growth and/or customer satisfaction. Universal Bankers have flexible schedules that may include weekends (depending on branch location).

We're looking for people who want more than just a job – who want to make a difference in the communities where we live and work. Apply today and explore what's possible with a career at U.S. Bank.

This position requires National Mortgage Licensing System (NMLS) registration under the terms of the S.A.F.E. Act of 2008 and Regulation Z. You will be subject to the required registration process, which includes a criminal background and credit check. Failure to meet or maintain any of the NMLS registration requirements, including maintaining a satisfactory criminal and credit record, may result in a rescission of your offer or termination of employment.

Basic Qualifications:

- High school diploma or equivalent
- One or more years of cash handling sales experience

Preferred Skills/Experience:

- One or more years of related experience in a financial services industry preferred
- Basic knowledge of retail product philosophy, policy, procedures, documentation and systems
- Thorough knowledge of all retail products and services
- Proven customer service and interpersonal skills
- Effective selling and referral skills
- Strong mathematical, problem-solving, and negotiation skills
- Strong verbal and written communication skills

- Commitment to our communities through employee volunteer opportunities
- Career advancement across more than 300 businesses in the Cox Enterprises portfolio
- The Nitty Gritty

Cox Business Account Executives (B2B) sell bundled telephony, data, and video solutions to new small to medium (20-99 employees) business customers in assigned territory; maintain on-going relationships with existing customers, and cross- and upsells customers as long as there is potential for uncovered account growth. Solutions set may include data/transport solutions (Internet, Ethernet), VoIP solutions (SIP Trunking, IP Centrex), and software-as-a-service. Refers leads to other members of outside sales team, as appropriate. Account Executives work independently in the field 70% of the week calling on and meeting with new or potential customers. The role is part of a goal-driven, sales organization with a core focus on growing revenue quickly.

Primary Responsibilities And Essential Functions:

- Identifies new prospects in assigned territory using multiple sources of sales leads (internal and external networking, and market analysis tools/software e.g. Dun & Bradstreet data to aid in investigating new and expanding businesses). Collects information about prospects' businesses from their websites and other sources to prepare for sales calls and assess potential applications. (Spends the most time on this activity.)
- Develops and maintains sales plans for own territory and for each account.
- Manages and maintains required pipeline and forecast data, and provides updates as required by management.

- Keeps customer database up to date by recording all activities, transactions, and communications with customers.
- Prepares regular expense, sales forecasts, and sales activity reports using software designed for that purpose.
- Refers contact information for a customer or prospect to another representative if the sale is not appropriate (e.g. out of territory, customer or prospect is too large or too small).
- Determines if the prospective customer is on or off-net.
- Communicates with prospective customers in person, by phone, email or other technology to develop sales opportunities and set an appointment to understand their business and explore mutually beneficial objectives, using solution selling techniques as appropriate.
- Meets with prospective customers in person or by conference call to collect information required to assess their communication needs in detail, estimate the amount and type of potential business the account represents, and qualify the prospect.
- Uses a spreadsheet-based tool to assess the ROI for prospects who are not currently on the Cox network and forwards the result for approval.
- Collaborates with Sales Engineer and Sales Support Team to determine appropriate solutions to meet customers' needs. Develops proposals and multi-media sales presentations.
- Makes face-to-face or web conference cost-justified sales presentations to customer decision makers. Uses solution selling techniques to leverage the position of Cox and the communications products it offers and to educate and influence customers.
- Demonstrates observable knowledge of the IMPACT training during the prospecting/selling process. Builds an effective consultative relationship with customers during the sales process to ensure customer satisfaction. Maintains relationships with customers in order to provide good service, develop future business opportunities, and gain referrals. May entertain customers.
- Negotiates pricing, products, and promotions with new customers. Verifies that service pricing reflects pricing structures set at the corporate level.
- Works with Order Entry Specialist to set up orders for installation. Works with Sales Engineer and/or Sales Support Team to address any issues regarding installation or service for the customer.
- Attends job-related training to increase knowledge of Cox and competitor telephony, data, wireless, and video services and offerings, customer premise equipment, networking, consultation, negotiation, and sales skills; attends strategic and/or development meetings with Sales management.
- Participates in internal meetings to create product packages, sales processes, communicate and coordinate sales, report on sales activities, implement new products, solve problems, and keep up-to-date with information about Cox.
- Creates and participates in opportunities to serve as a public representative and image builder of Cox in the local community in order to network and develop and maintain Cox's presence; e.g., promotes and/or attends non-profit event

Minimum:

- 2 or more years of experience required in related field
- 1 year telecommunications (telephony, data, and video) experience
- 1 year successful business-to-business outside sales experience preferred with quotas and cold calling
- Valid driver's license, good driving record, reliable transportation
- Requires 6 months experience using a computer in a work or non-work setting
- Excellent skill in adaptability, applied learning, assignment management, building relationships, written communication, customer service orientation, formal presentation skills, functional competence, high impact communication, continuous learning, negotiation, PC skills, reasoning, and sales skills, in order to work effectively with teams throughout organization.

Preferred:

- BS/BA degree in related discipline strongly desired
- 3 years business-to-business sales experience with quotas
- 1 year telecommunications sales experience
- Knowledge of local telecom market, local contacts

HireTech Opportunities San Diego, CA

A. Advance Planning Manager Support (Naval Ship Repair) HT-238 HireTech San Diego, CA http://www.hiretech.us/jobs

Job Description:

The candidate will be a direct report to the Senior Production Planner/Advanced Planning Manager. Provides continuous interface with the customer in regards to assigned work and ensuring work is properly scheduled to meet required planning milestones. Leads effort for developing metrics, advance planning reports, Lessons Learned Best Practices, and WEB based work package delivery system. Develops project production schedules required to meet established delivery dates for tasks related to U.S. Navy surface ship repair and modernization planning, material procurement, and availability planning services. Manages project efforts associated with both planning product and availability work package development. Monitors contractor resource capacity and existing work load; schedules work flow and establishes sequences for all assigned tasks. Identifies and applies additional resources to mitigate planning issues that may negatively impact attainment of established product delivery dates or subsequent delays to the planning process. Monitors performance measurements, by port and ship, to maintain planning product quality control, promotes continuous product improvement, and increased efficiencies in product development. Position requires a thorough understanding of the Joint Fleet Maintenance Manual ship repair planning and estimating requirements, U. S. Navy surface ship maintenance and modernization planning processes, use of the Navy Maintenance Database and use of the Validation, Screening, and Brokering automated information system.

Job Requirements and Experience:

Five to seven years managing U.S. Navy depot level surface ship maintenance planning and estimating functions and/or availability work package development. Preferred experience includes management, supervisory, or production controller roles at Supervisor of Shipbuilding, Conversion and Repair commands, Regional Maintenance Centers, Navy Central Planning Activities, Planning for Engineering and Repair Activities, and public or private shipyards at the tradesman or shop level. Experience as a Naval Supervising Authority Project Manager is also preferred.

Security Clearance: The candidate must be able to obtain and maintain a DoD Secret security clearance.

B. HT-239 Planner/Estimator (Naval Ship Repair) San Diego, CA HireTech San Diego, CA http://www.hiretech.us/jobs

Job Description:

Reports to the Supervisory Planner/Estimator. Responsibilities include taking all ship's force, Alteration Installation Team (AIT), and shipyard work, including service and repair routines, modernization and preventative maintenance actions, and presenting as work requirement statements at the SWLIN and Line Item level. This is currently recognized as a prime function of the Planning Activity organization, and ultimately results in the development and issuance of an availability specific, integrated specification work package. Provides detailed cost estimates, to the paragraph and trade level, for developed work specifications and new work written by planners. Maintains and manages the cost estimating guide. Must be experienced in NMD-R. Candidate will also be responsible for quality review of planning products to ensure comprehensive definition of all aspects of the work request; including boundaries, scope, interferences, technical requirements, quality assurance requirements, material cost and ordering specifications, definition of trade skills necessary and detailed material and man hour cost estimates. Applicant will be required to review engineering design plans, design concepts and proposals for adequacy, test specifications and fabrication and installation methods and processes. This position requires a thorough understanding of the Joint Fleet Maintenance Manual (JFMM), ship repair planning and estimating requirements, U.S. Navy surface ship maintenance and modernization planning processes, use of the Navy Maintenance Database and use of the Validation, Screening and Brokering (VSB) automated information system.

Job Requirements:

The candidate must have five or more years experience with developing production planning documents and estimates for work executed at U.S. Navy depot level surface ship maintenance and modernization facilities. It is preferred that the candidate has experience including: planner, estimator or shipbuilding specialist roles at Supervisor of Shipbuilding, Conversion and Repair commands, Regional Maintenance Centers, Navy Central Planning Activities, Planning for Engineering and Repair Activities, and public or private shipyards.

Security Clearance: The candidate must be able to obtain and maintain a DoD Confidential security clearance and be able to obtain a Common Access Card (CAC).

C. HT-249 Engineering Technician (Ship Checker) HireTech San Diego, CA http://www.hiretech.us/jobs

Job Description:

Reports to the West Coast Ship Check Supervisor in the Third Party Planning (TPP) Execution Division. Responsible for conducting ship checks onboard naval vessels, in direct support of advanced planning work specification development. Will utilize applicable drawings and references to conduct ship checks onboard Naval Vessels, validate provided Work Notifications, determine the scope of repairs, and provide an advanced planner with amplifying information to aid in work specification development. Will also identify shipboard interferences and any other special circumstances that will impact the planning process and work specification development. Will document these ship checks with detailed information and photographs on an approved ship check form in Portable Document Format (PDF).

Job Requirements:

The candidate must have extensive knowledge of shipboard structural, mechanical, piping and electrical systems and understand Navy shipboard compartmentation lay-out. The candidate must have the ability to read, understand and validate a Work Notification and to determine the scope of work contained within that Work Notification. The candidate must be familiar with Standard Drawing Indexes, Navy Standard Drawings, blueprints, system diagrams, Navy acronyms, and other technical publications and references. The candidate must have the ability to conduct research and determine the correct reference and/or drawing required for the scope of work identified in the Work Notification. The candidate must also have physical ability to climb ladders, transit decks and perform work onboard Naval Vessels. Approximately 10% overseas travel may be required. Knowledge of Microsoft Office and ADOBE programs including word processing, databases and spreadsheets is desired.

Security Clearance:

No security clearance is required for this position, however the candidate must be able to obtain a Common Access Card (CAC) and/or Defense Biometric Identification System (DBIDS) credential to allow Naval installation access.

Please submit current resume to HireTech via Email. Provide the following additional information in the cover email:

Contact information. Availability for interview. Earliest start date if offered a position. http://www.hiretech.us

Salary: \$74,009.00 - \$111,013.00 Annually

Job Number: 31 FY18/19

Closing: 1/18/2019 11:59 PM Pacific

We are looking to hire a senior GIS analyst to help take the Port's GIS environment to the next level. The successful candidate will be working on projects such as, Asset Management, Computer Aided Dispatch, Port Master Planning, among other exciting projects that will make a positive impact to the San Diego region.

Description:

The Geographic Information System's section in the Information Technology Department is currently recruiting for a Geographic Information System (GIS) Analyst III. Under guidance of the GIS Supervisor, the GIS Analyst III will be responsible for the migration of the existing online GIS environment into the ArcGIS AGOL/Portal. The GIS Analyst III will design, test, implement and maintain AGOL/Portal applications to satisfy the needs of internal and external customers.

GENERAL PURPOSE:

Under direction of the Geographic Information Systems Supervisor, plans, organizes, coordinates and participates in the development and implementation of the District's geographic information system (GIS); directs and participates in the long-term development and enhancement of GIS information technology to meet District end user service objectives; performs GIS modeling duties; provides expertise, support, assistance and guidance to District staff and external contacts; and performs related duties as assigned.

DISTINGUISHING CHARACTERISTICS:

Geographic Information Systems Analyst III is a journey-level professional class requiring the application of a body of GIS theory and principles. The Geographic Information Systems Analyst III completes advanced professional level work assignments or projects. The position's duties require interacting with multiple internal and/or external units or individuals to meet District work requirements and objectives. The incumbent must have sufficient job content knowledge in the functional area to ensure District standards are met.

Geographic Information Systems Analysts III independently performs responsible analytical and developmental work in support of the District Geographic Information System and other management goals and objectives. Assignments are typically received in terms of expected outcomes and incumbents are expected to act independently to develop required information, including selecting approach and analytical techniques, and to provide sound analyses and recommendations. Assigned projects may include analysis, application development, database design or other areas specific to the assignment.

Essential Duties and Responsibilities:

The following statements are intended to describe the general nature and level of work performed by people assigned to this classification. They are not intended to be an exhaustive list of all responsibilities, duties and skills required of personnel so classified;

- Demonstrate advanced knowledge and experience in the use of ArcGIS Server software and its extensions.
- Create programs and develop programming code to solve GIS related problems and present data in a user friendly format using specified programming languages such as, SQL, Visual Basic, .NET, and Python among others, to automate GIS processes.
- Develop stand-alone or web based GIS applications using Portal for ArcGIS, including user guides, for departments or Districtwide use.
- Demonstrate expertise in all of the following areas: database development; application development, advanced server side administration.
- Leads in application development and database development efforts, server side administration, development and implementation of standards, procedures, and industry best practices.
- Leads the collaboration with other GIS staff and various District departments to understand their geographic data needs, and generates standard and customized products from the GIS such as presentation, digital graphics and reports for users in all District departments.
- Leads the development of data quality and cartographic standards, and defines best practices for GIS operations. Makes recommendations to the Geographic Information Systems Supervisor on software acquisitions and configurations. Assists in the maintenance of GIS and related software systems.
- Leads, in collaboration with the Geographic Information Systems Supervisor, with problem and/or process identification, definition, and solution development, recommends improvements, modifications, and automated solutions.
- Leads, in collaboration with the Geographic Information Systems Supervisor, the maintenance of desktop GIS software; applies patches, and troubleshoots technical problems.

- Manages assigned projects related to GIS operations, which includes: interpreting and completing work requests, analyzing situations, preparing related documentation, and performing other related tasks.
- Perform system backups and other system maintenance operations on the GIS.
- Research and recommend utilization of new or untapped functionality in software to achieve desired results and solutions,
- Serves as a project lead on data development, data conversion, and data maintenance projects, which includes prioritizing and assigning work and training lower level staff on work methods.
- Tests, installs, and maintains software/applications, prepares user documentation, which includes, user guides, and training materials.
- Train subordinate staff, and provide technical guidance to staff on GIS application uses.
- May be required to perform all the duties of the Geographic Information Systems Analyst II.

Qualifications

Knowledge of:

- Programming knowledge of SQL, Visual Basic, .NET and Python or C# to automate GIS processes and customize interfaces.
- Advanced knowledge and experience in the use of the ArcGIS technology stack with and emphasis in ArcGIS Server and its extensions.
- Application development using Portal for ArcGIS.
- Database development, application development, advanced server side administration.
- Principles of project management to manage the technical aspects of departmental projects and to facilitate own projects.

Ability to:

- Plan, organize, integrate, monitor, and maintain a comprehensive GIS and its related applications to meet District-wide customer service objectives, including assisting in the development long-range GIS system goals.
- Assist in the development of effective customer-focused service processes with District managers and end users
- Research GIS technology and make recommendations for current or future GIS needs.
- Understand, analyze and define user requirements and recommend cost effective systems solutions.
- Analyze complex problems, evaluate alternatives and make sound independent decisions within established guidelines.
- Train others in the use of GIS applications.
- Organize, plan and complete projects efficiently.
- Plan and coordinate multi-disciplinary work efforts in order to meet timelines.
- Prioritize and coordinate several work activities, research, organize, and maintain accurate office files.
- Work collaboratively and effectively with project teams including user representatives and outside resources and others encountered in the course of work.
- Communicate effectively, orally and in writing.
- Establish and maintain effective working relationships with those encountered in the course of work.

MINIMUM REQUIREMENTS

Education, Training and Experience:

Graduation from a four-year college or university with a major in GIS, computer science or a closely related field; and five years of progressively responsible experience in the design and development of GIS systems and applications. A Master's degree is desirable.

***Time served as a District Intern counts towards the years of experience

B. Geographic Information Systems Analyst II Port of San Diego San Diego, CA THIS IS A LIMITED FULLTIME POSITION Salary: \$57,103.00 - \$82,800.00 Annually

Job Number: 30 FY18/19

Closing: 1/18/2019 11:59 PM Pacific

We are looking to hire a GIS analyst to help take the Port's GIS environment to the next level. The successful candidate will be working on projects such as, Asset Management, Computer Aided Dispatch, Port Master Planning, among other exciting projects that will make a positive impact to the San Diego region.

Description:

The Geographic Information System's section in the Information Technology Department is currently recruiting for a Geographic Information System (GIS) Analyst II. Under guidance of the GIS Supervisor, the GIS Analyst II will be responsible for maintenance of the existing GIS databases and development of future GIS feature classes as determined by customer needs. The GIS Analyst II will also work with the GIS Analyst III to provide web services and configurations to best utilize the Port's AGOL/Portal environment.

GENERAL PURPOSE:

Under the direction of the Geographic Information Systems Supervisor, participates in the development, maintenance and implementation of the District's geographic information system (GIS); participates in the long-term development and enhancement of GIS information technology to meet District mapping and end user service objectives; performs GIS modeling duties; provides expertise, support, assistance and guidance to District staff and external contacts; and performs related duties as assigned.

DISTINGUISHING CHARACTERISTICS:

Geographic Information Systems Analyst II is a journey-level professional class requiring the application of a body of GIS theory and principles. The Geographic Information Systems Analyst II complete standard professional level work assignments or projects. The position's duties require interacting with multiple internal and/or external units or individuals to meet District work requirements and objectives. The incumbent must have sufficient job content knowledge in the functional area to ensure District standards are met.

Geographic Information Systems Analysts II performs responsible analytical work in support of the District Geographic Information System and other management goals and objectives. Assignments are typically received in terms of expected outcomes and incumbents are expected to act in a team environment to complete assigned projects may include analysis, exhibit production, or other areas specific to the assignment.

Essential Duties and Responsibilities:

The following statements are intended to describe the general nature and level of work performed by people assigned to this classification. They are not intended to be an exhaustive list of all responsibilities, duties and skills required of personnel so classified;

- Demonstrate a moderate to advanced knowledge of the use ESRI ArcGIS software to enter, edit and output geographic information, and be familiar with the Windows operating system and file systems.
- Performs research and analysis of geographic and tabular data from public and private sources for integration to the District's enterprise GIS, presents results to other departments.
- Assists with problem and/or process identification, definition, and solution development, recommends improvements, modifications, and automated solutions, and takes corrective action to resolve problems.
- Assists in training District staff in the use of GIS on an individual basis or in a classroom setting.
- Assists with application development and database development efforts.
- Maintains, and conducts Quality Assurance/Quality Control (QA/QC) of geographic data sets using a variety of software and source data. Creates and maintains GIS database metadata to support enterprise GIS efforts at the District.
- Provides information, resources, support and assistance to users of GIS software and/or custom applications. Responds to inquiries and gives problem solving assistance.
- Provides technical guidance to staff involved in interpreting satellite photos, cartography, data analysis, experimental design and capturing data for conversion into GIS usable formats.
- Under direction, collaborates with other GIS staff and various District departments to understand their geographic data needs, and generates standard and customized products from the GIS such as presentation maps, digital graphics and reports for users in all District departments.

- Utilizes a variety of District systems to find and collect data for use in everyday work such as: Document Management System, Asset Management System, and manual files. Researches and analyzes geographic and tabular data from public and private sources for integration into the District's enterprise GIS.
- Within their work assignments, demonstrates an effort to improve operations, decrease turnaround times, streamline work processes, and work cooperatively to provide seamless and quality customer service.
- Performs complex geoprocessing and geospatial analysis, and designs and produces advanced cartographic products.
- Train subordinate staff, and provide technical guidance to staff on GIS application uses.
- May be required to perform all the duties of the Geographic Information Systems Analyst I.

Qualifications

Knowledge of:

- GIS concepts, including advanced techniques of geoprocessing and spatial analysis, and geographical concepts of location, scale, resolution and generalization.
- Principles and practices of GIS systems, uses and applications, including hardware and software applications, map production, methods and techniques of conducting research and analyzing geographic and other related data.
- Use and understand GIS tools (specifically ESRI products) and methodologies to operate a variety of geographic information system input and output devices, including printers, plotters and other GIS related peripheral equipment/devices in a Windows environment.
- Working effectively to maintain productive relationships with management, employees, employee representatives, and the public representing diverse cultures and backgrounds.
- Communication, interpersonal skills as applied to interaction with coworkers, supervisor, the general public, etc. sufficient to exchange or convey information and to receive work direction. Exercise appropriate judgment in answering questions and releasing information.
- Data collection methods, Database management principles, Analytical methods and techniques.

Ability to:

- Prepare analyses using various related geographic information system software.
- Provide technical guidance to staff on GIS application.
- Analyze a variety of geographic and mapping data and develop logical conclusions and solution.
- Research methods and techniques related to collecting, analyzing, and evaluating geographic/land use related data.
- Assess the customer's immediate needs and ensure customer's receipt of needed services through personal service or making appropriate referral.
- The ability to easily adapt to ongoing technological developments and advancements

MINIMUM REQUIREMENTS

Education, Training and Experience:

- Equivalent to a Bachelor's degree or equivalent coursework from an accredited college or university with major course work in geography, planning, natural resources, or computer science including coursework in GIS. A Master's degree is desirable.
- At least three years of experience using ESRI ArcGIS software in the development and maintenance of a multi-user geographic information system. Experience interpreting topographic maps, engineering improvement plans, and "as built" plans is also required.

***Time served as a District Intern counts towards the years of experience

POC: Marco Cromartie, cromartie.m.j@gmail.com

Inspector 2 Northrop Grumman San Diego, CA Full-time

Estimated: \$41,000 - \$59,000 a year

At Northrop Grumman, our employees have incredible opportunities to work on revolutionary systems that impact people's lives around the world today, and for generations to come. Our pioneering and inventive spirit has enabled us to be at the forefront of many technological advancements in our nation's history - from the first flight across the Atlantic Ocean, to stealth bombers, to landing on the moon. We look for people who have bold new ideas, courage and a pioneering spirit to join forces to invent the future, and have fun along the way. Our culture thrives on intellectual curiosity, cognitive diversity and bringing your whole self to work - and we have an insatiable drive to do what others think is impossible. Our employees are not only part of history, they're making history.

Northrop Grumman Innovation Systems designs, builds and delivers space, defense and aviation-related systems to customers around the world. Our main products include launch vehicles and related propulsion systems; missile products, subsystems and defense electronics; precision weapons, armament systems and ammunition; satellites and associated space components and services; and advanced aerospace structures.

Our facility in San Diego, CA is seeking an experienced Inspector with relevant aerospace industry experience in our Quality Assurance department. This employee will be working on small, medium and/or large government and commercial programs.

Essential Duties & Responsibilities:

- Support company objectives by performing a variety of Inspection tasks including:
- Programming and Operating CMM's and Portable Arms (Romer Arm, Faro Arm)
- Perform Surface Plate inspections using a variety of hand tools
- Perform visual and dimensional inspections supporting in-process, final and receiving inspection operations
- Perform source inspections at suppliers when required
- Perform First Article Inspection IAW AS9102
- Maintain CMM& CMM software in good working order
- Train others on proper blueprint reading techniques, appropriate use of gauges and the use of CMM
- Use CMM to perform First Article Inspection and provide data to Supervisor/Manager and or/engineers for assessment and material disposition
- Conduct part layouts and capability studies to assure parts meet or exceed dimensional requirements of the customer
- Strong CMM knowledge of tools, measuring equipment and inspection procedures, including sampling plans to accurately inspect all types of incoming, in-process or final components/assemblies/products for conformance to predetermined specifications
- Strong knowledge of using precision hand tools, gages, calipers, micrometers, etc.
- Have a strong knowledge of reading and interpreting part and drawings
- Create, debug and verify new CMM programs using a cad solid model

Qualified Candidates should possess the following:

- 2-5 years Aerospace Inspection experience
- Excellent Blueprint reading skills
- Proficient use of measuring tools such as Calipers, Micrometers, and Height Gages
- Composite Manufacturing experience a plus
- Knowledge and application of Geometric Dimensioning and Tolerance(GD&T)
- Positive Team Attitude
- Ability and willingness to work overtime when required

Kenneth Friend Senior Recruiter Kenneth.Friend@ngc.com

Sr. Cost Accountant
EDF Renewables North America

San Diego, CA Full time

EDF Renewables, a subsidiary of EDF Energies Nouvelles, is a leading North American independent power producer boasting over 30 years of experience across a broad spectrum of services. Our mission is turning innovative renewable energy ideas and long-term relationships into an ethical, high value sustainable business.

The Senior Accountant position, as part of the Costing Team, Asset Origination, is responsible for tracking and analyzing the financial status of the assigned development and construction projects. These activities cover the various phases from the initial project setup in SAP to asset origination to commercial operation date. This position is the focal point and custodian of all current and historical related information for each assigned project.

Responsibilities Include, But Not Limited To:

- Coordinate with the GL Team on the closing calendar for each reporting period and oversee the Costing Team closing checklist to ensure tasks are completed timely.
- Continue to identify efficiencies with job cost reporting, interaction with program managers, COD accrual process, transferring of projects to Generation, construction template reconciliations, etc.
- Upload various stages of budgets into SAP, ensuring a thorough understanding is obtained, and perform budget revisions as necessary.
- For assigned projects, reconcile job cost reports to the general ledger on a monthly basis and ensure accuracy.
- Actively lead and participate in monthly job cost review meetings.
- Maintain active consistent communication with the developer, contracts manager and/or project program manager for all assigned projects.
- Review of all significant procurement contracts ensuring purchase orders are properly coded in SAP in accordance with the terms of the contracts, an understanding of the payment terms is obtained, retention is properly handled with each pay application, etc.
- Perform monthly accrual journal entries in accordance with work completed, procurement deliveries to the site, etc. and ensure payables are properly stated for each period ended, including the final completion accrual at commercial operation date.
- Coordinate and prepare the quarterly submission of estimates working closely with FCPA.
- Working closely with Treasury, prepare cash to accrual reconciliation for assigned projects ensuring future project cash spend is reasonable.
- Ensure all active and continuing COD job cost reports are uploaded into Prosystems on a monthly basis and properly signed off by the assigned cost accountant.
- Provide mentoring and training to cost accountants, as appropriate.

Qualifications:

- Bachelor's degree (or equivalent) in accounting or finance required.
- Active Certified Public Accountant (or equivalent, such as a Certified Management Accountant or a Chartered Accountant) licensure highly desirable.
- A minimum of 2-4 years' experience working within an accounting department (preferably mid-size to large company), and/or in public accounting.
- Working knowledge of either US Generally Accepted Accounting Standards or International Accounting Standards.
- Experience with an integrated accounting software package and experience with SAP preferred.
- Extensive experience with an integrated accounting software package along with extensive knowledge of Microsoft Excel.
- Highly motivated self-starter, friendly personality and team player attitude that can become an asset to the organization.
- Ability to follow through on assigned tasks from start to finish, research, analyze and problem-solve.
- Excellent administrative, organizational and communication skills required.

Karina Mavasheva Recruiting Manager karina.mavasheva@edf-re.com

Our job is to make sure that America's heroes get connected to health care in the community.

At TriWest Healthcare Alliance, we've proudly been on that important mission since 1996.

Are you our next Patient Services Representative?:

Do you find satisfaction in helping others? Do you enjoy working in a self-driven and dynamic environment? Do you thrive on challenge and take your responsibilities seriously? Are you looking for a job that is meaningful and rewarding? Whether you prefer to work in an operation center with your colleagues or from the comfort of your own home office, we have a position for you.

Our Patient Services Representatives are:

- Caring and Empathetic. You understand the needs of others and work hard to exceed their expectations.
- Diligent. You work well within a clear set of expectations and guidelines but can overcome obstacles as needed.
- Determined. You enjoy working on your own while being a part of a supportive team.
- Thorough. You have a desire to get things done on time and with accuracy.
- TriWest Patient Services Representatives**:
- Initiate calls to Veterans to educate them on their health care options and choices.
- Reach out to health care professionals in the community to coordinate medical appointments and follow-up care needs for Veterans.
- Provide customer service to Veterans and health care professionals through the course of their health care journey.
- Follow processes of the Department of Veterans Affairs (VA) program and perform all tasks in a courteous and professional manner.
- Protect the health care privacy of patients by strictly following HIPAA regulations.
- Research systems to find missing information; coordinate with other TriWest departments to resolve issues.
- Work in a variety of technologies to perform required tasks.
- Manage prioritized tasks in a time-sensitive environment.
- Perform other tasks as assigned by leadership.
- Are you qualified?**
- Are you a Veteran, family member of a Veteran, a friend of a Veteran, or passionate about helping Veterans?
- Do you have a high school diploma or G.E.D.?
- How about at least one full year of experience working with customers?
- Have you ever worked in a healthcare environment (very helpful)?
- Are you proficient with a computer including Microsoft Office, the Internet, and other systems?
- Do you have familiarity with medical terms or work experience understanding medical codes (if not, we can teach you)?

More About Working at TriWest Healthcare Alliance

Benefits:

Of course, we also offer a comprehensive and progressive compensation and benefits package that includes

We're more than just a health care company. We're passionate about serving others. We believe in rewarding loyal, hard-working people who are willing to learn as they grow. TriWest Healthcare Alliance values teamwork. Team members work from home or in one of our state-of-the-art facilities. Join our team, fulfill your responsibilities, and you may also be considered for frequent pay raises, overtime opportunities to earn even more, recognition and reward programs, and much more.

- Medical, dental and vision coverage
- Generous paid time off
- 401(k) Retirement Savings Plan (with matching)
- Short-term and long-term disability, basic life, and accidental death and dismemberment insurance

Are you ready to make a difference in the lives of our nation's heroes?

Patricia Haley, PHR Sr. Recruiter (Contractor cabohaley@msn.com

Customer Advocate Representative
HD Supply Support Services
San Diego, CA
Job ID 2018-30407
Remote Position? No
Full-Time
Competitive Benefits And Compensation.

If you re ready to find a rewarding career and achieve your full potential with a growing industry leader, HD Supply is ready for you!

Job Summary

Job Description & Qualifications:

Responsible for addressing customer issues, documenting the customer issue and providing the optimal customer experience.

Major Tasks, Responsibilities and Key Accountabilities:

- As a member of the Voice of the Customer team, responsible for capturing customer issues and working with the customer and business to resolve. Act as a direct interface to our customers in resolving issues and providing an optimal customer experience.
- Performs problem solving and trouble shooting of escalated complex customer issues (including but not limited to: tracking of packages, out of stock issues, payment discrepancies, returns, product inquiries and pricing).
- Interacts with appropriate department/person to recommend actions to achieve resolution and customer satisfaction. Submissions that require interdepartmental action are forwarded to the appropriate department/person.
- Identify and document current trends from customer entries.
- Enters customer data in the system in an accurate and timely manner and tracks issues to closure.

Nature and Scope:

- May modify processes to resolve situations.
- Under limited supervision, relies on experience and exercises independent judgment to determine the best approach to achieve desired outcomes. Course of action is often determined by interpreting procedures and policies. Work typically involves periodic review of output by a supervisor or direct customers of the process.
- Is sought out and/or assigned to provide general guidance/direction, training, and technical assistance to junior level support personnel. Contributes to employees' professional development but does not have hiring/firing authority.

Work Environment

- Located in a comfortable indoor area. Any unpleasant conditions would be infrequent and not objectionable.
- Most of the time is spent sitting in a comfortable position and there is frequent opportunity to move about. On rare occasions there may be a need to move or lift light articles.
- No travel required.

Education and Experience:

• Technical certification or associate degree may be required in some areas. Generally 5-7 years of experience in a related area of responsibility.

Preferred Qualifications

Preferred Qualifications & Job Specific Details:

- Must have at least 6 months of customer care experience within HD Supply to be eligible for this position.
- Associates degree.
- 1 year of customer experience.

Payroll Specialist Another Source Greater San Diego, CA Area Full time

Another Source's client, Innovative Employee Solutions (IES), is recruiting a Payroll Specialist to join their team in San Diego.

This is a full-time opportunity that comes with a generous PTO plan, training & growth opportunities, and the chance to work for a company that has been named one of San Diego's Best "Places to Work" for 10 years in a row.

Here's a little about IES and the position they are recruiting for:

Innovative Employee Solutions (IES) a San Diego based company, offering payrolling and HR administration to companies in the U.S. and Canada. As the employer of record, IES manages the payroll, payroll taxes, benefits and HR administration for our clients, specializing in the contingent workforce. Since 1974, IES has grown to be one of San Diego's largest women-owned businesses.

Empowering great people to do great work: that's the secret of our success. We offer our staff a professional and supportive work environment along with competitive salary and benefits packages. IES employees are given regular opportunities for growth and advancement, and are encouraged to continue their professional development through ongoing training and certification programs sponsored by the company.

Primary Function:

The Payroll Specialist is primarily responsible for accurate and timely processing of timecard entry, data entry, payroll processing, payroll distribution and invoice distribution. The Payroll Specialist will manage the entire payroll process from beginning to end for assigned clients for nationwide payrolls.

Success in this position will be measured by the department producing accurate and timely payroll for our employees and invoicing for our clients.

Essential Job Functions:

- Processes multiple payroll cycles on weekly basis for both hourly and salary employees.
- Prepares and issues regular and off-cycle paychecks.
- Enters data into payroll system to compute wages and deductions necessary to process and meet payroll deadlines.
- Responsible for the accurate input of new hire applicant packets, employment changes, direct deposit, pay cards, and other tasks related to onboarding, as well as terminations.
- Reviews wage calculations and corrects errors to ensure accuracy of payroll.
- Posts data to payroll records.
- Complete various administrative tasks to update employee records each pay cycle.
- Responsible for time sheet tracking analysis; includes follow up with employees and clients for timely entry and approval.
- Runs integration for timecard import system.
- Responsible for expense report analysis to ensure proper documentation received.
- Creates invoices using internal records management system.
- Submits invoices to Accounting Team for distribution to clients.
- Maintains client files for client specific reporting.
- Responds and resolves employee payroll issues
- Maintains employee information as confidential and secure
- Prepares mail distribution and identifies checks for overnight distribution.
- Knowledgeable of wage and tax laws, and corresponding with federal, state and local tax agencies.

Minimum Requirements:

• Experience with large companies and multiple client accounts.

- Multi-state payroll processing preferred.
- Very strong process & organizational skills.
- Exceptional ability to multi-task with an emphasis on attention to detail and quality.
- Excellent written and oral communication skills.
- Knowledge of gross to net calculations.

Another Source works with their clients, on a retained project basis, to maximize the recruiting process.

We have great part-time and flexible schedules! Start your phenomenal career with Allied Universal today!

Job Description

Allied Universal Services is currently searching for a Department of Defense (DoD) Cleared Security Officer.

An Allied Universal Professional Security Officer assigned to this specific job position will be responsible for the protection of and access to highly classified and sensitive equipment, technology and information. Protection of this equipment is extremely regulated in a controlled environment and only highly qualified Professional Security Officers are charged with this critical responsibility. Rigorous adherence and understanding of security protocols is mandatory, as is a US Government security clearance. The Allied Universal Professional Security Officer candidates for this position will undergo an extensive vetting process by Allied Universal, the client and the US Government (DoD). This mandatory process is lengthy and thorough.

Allied Universal Professional Security Officers perform many tasks including preserving order and enforcing regulations and directives for the site pertaining to personnel, visitors, and premises. Officers may be required to patrol or respond to calls for service on the facility by foot, bicycle, or vehicle. Other duties required of a professional security officer include working at an entry control point to a facility and answering phones, greeting guests and assisting employees.

Essential Tasks (list not all inclusive):

- Protect persons, assets and information
- Respond to and assess security alarms or emergency alarms, emergency situations, medical aid, fires, oxygen deficiency alarms, first responder; secure classified information, escort visitors and contractors, secure ingress and egress situations
- Ensure the highest quality security services in the protection of personnel, property and information with professionalism; fulfill duties politely, without fear or favor
- Preserve order and enforce rules, regulations and directives for the viability of the site and the safety of personnel, equipment and sensitive information
- Greet guests and employees in a cheerful and welcoming manner
- Answer guestions and assist guests and employees
- Patrol the facility, internal and external
- Report safety concerns, security breaches and unusual circumstances, both through written and verbal means
- Know site-specific operations performance manuals and post orders
- Open/close, lock/unlock sensitive rooms and areas
- Conduct personal sweeps in closed areas; monitor prohibited items in certain areas
- Conduct "person lookups" for rights and permissions to specific areas and rooms
- Correspond and interact with corporate security personnel regarding orders and execution

Foundational requirements:

- Minimum of 3-5 years high-level security experience on DOD site or similar in military
- High School Diploma or GED required; Associate Degree or higher (preferred)
- Ability to write clear concise incident reports
- Understand proper radio protocol

- Possess a good working knowledge of Excel, Word and PowerPoint
- Be articulate and able to explain a situation coherently
- Be a leader and self-starter
- Have experience managing or leading a team of individuals
- Understand accountability and lead by example
- Be able to obtain a Department of Defense (DoD) position appropriate level security clearance

Basic requirements for the US Government clearance are as follows: The US Government adjudicators consider the totality of the investigation when issuing a clearance. If you have any questions regarding these requirements, you may request consultation with the Allied Universal Services Compliance Manager/Facility Security Officer.

- Applicant must be a US citizen
- Applicant cannot hold citizenship in any country is addition to the US
- Applicant cannot have any foreign property, business connections or foreign financial interests
- Applicant's immediate family must be US citizens; This includes spouse, parents, step parents, brothers, sisters, step brother, step sister, in laws and non-family cohabitants; If the applicant is unmarried, applicant cannot be cohabitating with a non-US citizen
- Applicant must have very good credit, including no debt that is in default or not paid as agreed, and no bankruptcy filed in last 5 years
- Applicant must be willing to disclose if s/he has ever been arrested, investigated, detained, or charged with any criminal offense, including under the Uniform Code of Military Justice (UCMJ)
- Applicant must be willing to disclose if s/he has ever pled guilty or pled no contest to any charge (felony, misdemeanor, military code or traffic offense
- Applicant must be willing to disclose if s/he has been a part of any civil court proceedings within the last seven (7) years
- Applicant must be willing to disclose if s/he has ever had any disciplinary or counseling action related to their use of alcohol
- Applicant must be willing to disclose if s/he has EVER used, purchased or sold any illegal drugs
- Applicant must be willing to disclose if s/he has consulted with a medical professional about a mental health condition other than marital, family, PTSD or grief counseling
- Applicant must be willing to disclose if s/he has ever defaulted on a loan, declared bankruptcy or had personal property repossessed in the last ten (10) years
- Applicant must be willing to disclose if s/he has had ANY debt placed in collections in the last seven (7) years
- Applicant must be willing to disclose if s/he has EVER had a tax lien or wage garnishment
- Applicant must be willing to disclose if s/he is currently delinquent on any taxes (federal, state or local)
- Applicant must be willing to disclose if s/he has ever been late or are currently delinquent on any child support payments
- Applicant must be willing to disclose if s/he has deliberately misused an automated/computer information system
- Applicant must be willing to disclose if, in the last ten (10) years, s/he had any of the following situations occur:
- 1. Fired from a job
- 2. Quit a job after being told they would be fired
- 3. Left a job by mutual agreement following allegations of misconduct
- 4. Left a job by mutual agreement following allegations of unsatisfactory performance
- 5. Left a job for other reasons under unfavorable circumstances

(NOTE: The government reserves the right to require an individual to take a polygraph at any time once the individual has been approved for a security clearance)

This is a highly visible and trusted position for which ONLY qualified candidates will be considered. If you qualify based on the above requirements, please complete the position application.

If you do not qualify for this specific position, please feel free to complete an application with Allied Universal Services for another position.

Store Manager – Greater San Diego CA Starbucks Mission Valley, Chula Vista, South San Diego, CA Full time

Now Brewing - Future Leaders! #tobeapartner

Starbucks is known for developing extraordinary leaders who drive business success by doing the right thing for partners (employees), customers and communities – globally. As a Starbucks leader you are driven by a deep sense of purpose. You are aspirational - never a bystander. You take action to make a positive difference every day, and you inspire others to do the same.

Our Store Managers bring the Starbucks experience to life by managing store operations, driving financial success, building great teams, and building a meeting place in their communities. They delight and uplift customers through a human connection. Their work goes beyond a perfectly made beverage; it's about human connection. They enjoy being able to achieve these aspirations autonomously, while leveraging our world class brand and business practices.

"Starbucks best store managers are coaches, bosses, marketers, entrepreneurs, accountants, community ambassadors, and merchants all at once. They are optimistic problem solvers who run their stores creatively yet analytically, calling upon passion

and intelligence to drive customer traffic, partner loyalty, and profit. The best managers take their jobs personally, treating the store as if it is their very own. – Howard Schultz, Chairman, Starbucks Coffee Company

We will enable you, leveraging your retail experience, to autonomously:

- Grow a successful, multi-million dollar business: drive sales leveraging your business acumen, efficiency and problem solving skills
- Nurture talent & lead a team: engage the hearts and minds of your team and develop their skills so that they realize their personal best, both as individuals and as thriving teams
- Inspire others: become a dynamic brand ambassador dedicated to driving and achieving results through your team
- Impact your Community: integrate your business with the community to create better moments in peoples' lives, from our partners to our customers, communities and planet

We'd Love To Hear From People With:

- 3 years retail / customer service management experience or 4+ years of US Military service
- Strong organizational, interpersonal and problem solving skills
- Entrepreneurial mentality with experience in a sales focused environment
- Strong leadership skills and the ability to coach and mentor team partners with professional maturity
- Minimum High School or GED

Requirements:

- Legal documentation establishing your identity and eligibility to be legally employed in the country in which you apply.
- Ability to work full time (the work regularly demands in excess of 40 hours per week) including variable hours including early mornings, evenings, weekends and/ or holidays.

Let us give you the opportunity to grow as an individual, to build lasting relationships and make an impact in a place where people, quality and value mean everything.

Join us and connect with something bigger, apply today!
